

AYOOB NAZEER

Senior Front-End Developer

PROFESSIONAL SUMMARY

Senior Front-End Developer with 9+ years of experience in designing and implementing scalable web solutions, utilizing a comprehensive skill set including React.js, Next.js, and Angular. Demonstrates proficiency in transforming legacy systems into modern, high-performing architectures, ensuring seamless user experiences and robust backend functionality with Node.js and Express.js. Known for innovative approaches in performance optimization and user engagement, consistently achieving significant improvements in application efficiency and user satisfaction.

EMPLOYMENT HISTORY

SENIOR FRONT-END DEVELOPER

CNA Insurance

Jun 2018 - Present

Chicago, IL

- ◆ Developed responsive UIs with React.js and Next.js, improving front-end performance by 40%.
- ◆ Designed and implemented a micro-frontend architecture using React.js and Module Federation, enabling independent deployment of features and reducing build times by 35%.
- ◆ Implemented server-side rendering (SSR) with Next.js to improve load times, enhancing the overall user experience.
- ◆ Redesigned legacy architecture into a modular React SPA using microservices, enabling seamless scaling to accommodate a 200% surge in active users while maintaining 99.9% uptime.
- ◆ Built and maintained RESTful APIs using Node.js and Express.js, handling 10,000+ daily requests with 99.9% uptime and sub-200ms average response times.
- ◆ Designed and implemented a GraphQL API layer using Apollo Server with Node.js, reducing over-fetching by 60% and improving mobile app performance by 45%.
- ◆ Built Express.js middleware for request validation, authentication (JWT, OAuth 2.0), CORS handling, and request logging, improving API security and maintainability.
- ◆ Designed and implemented MongoDB database schemas for policy management and claims processing, optimizing queries to reduce data retrieval times by 50%.
- ◆ Implemented CI/CD pipelines (GitHub Actions, Concourse CI) and containerized applications using Docker and Kubernetes on GCP and Azure.
- ◆ Utilized CSS preprocessors (SCSS/LESS) and Tailwind CSS to streamline styling and improve maintainability of the codebase.
- ◆ Enhanced user experience through responsive design, data visualization, and adhering to WCAG AA guidelines.
- ◆ Resolved rendering inconsistencies in Safari and legacy Edge browsers by polyfilling CSS Grid gaps and adopting PostCSS.
- ◆ Accelerated development workflows by integrating AI-powered coding assistants (GitHub Copilot, Cursor AI) for code generation and refactoring, reducing boilerplate coding time by 25% and improving consistency in TypeScript/React implementations.
- ◆ Enhanced application performance through strategic code optimizations, achieving substantial improvements in load times and user engagement.
- ◆ Analyzed user feedback to inform iterative design improvements, resulting in noticeable gains in user satisfaction and retention.
- ◆ Mentored junior developers in best coding practices, fostering a culture of learning and enhancing overall team productivity.
- ◆ Spearheaded the integration of AI-driven tools, streamlining workflows and enhancing code consistency across projects.
- ◆ Analyzed user feedback to iterate on features, driving noticeable gains in usability and overall performance.
- ◆ Maintained rigorous documentation standards for codebases, ensuring clarity and ease of onboarding for new team members.

FRONT-END DEVELOPER

Mar 2016 - Jun 2018

Citigroup

Irving, TX

- ◆ Developed dynamic web applications with Angular and TypeScript, increasing user engagement by 20% and optimizing SEO/accessibility (WCAG), boosting site traffic by 15%.
- ◆ Built reusable Angular 2 components and services for financial dashboards, reducing code duplication by 40% and accelerating feature delivery across multiple product teams.
- ◆ Developed and consumed RESTful APIs using Angular HttpClient and RxJS operators, implementing proper error handling, retry logic, and request interceptors for authentication tokens.
- ◆ Implemented state management using RxJS and Observables, optimizing data flow and improving application performance by 25%.
- ◆ Designed A/B testing frameworks, improving conversion rates by 12%, and resolved cross-browser compatibility issues for consistent UX.
- ◆ Collaborated with UX designers and back-end teams using Agile methodologies to deliver pixel-perfect, responsive interfaces for banking applications.
- ◆ Optimized application bundle sizes using lazy loading and code splitting techniques, reducing initial page load time by 30%.
- ◆ Implemented RESTful API integrations with Cloud CMS for real-time content delivery, improving page load performance by 35% through efficient content caching strategies.
- ◆ Enhanced user experience by optimizing application performance, leading to noticeable improvements in load times and overall user satisfaction.

EDUCATION

BTECH HIGHER NATIONAL DIPLOMA IN COMPUTING (ASSOCIATE DEGREE)

Feb 2005 - 2008

International College of Business and Technology

Kandy, Sri Lanka

SKILLS

HTML5, CSS, JavaScript, TypeScript, React.js, Next.js, Angular, Node.js, Express.js, REST API, GraphQL, Apollo Client, Apollo Server, Tailwind CSS, SCSS, LESS, Bootstrap, D3, MySQL, PostgreSQL, MongoDB, DynamoDB, Azure, GCP, Docker, Kubernetes, Redux, Figma, Webpack, Vite, Jira, Confluence, Bitbucket, GitHub Copilot, Cursor AI, Claude AI, Jest, Vitest, Cypress, React Testing Library, Cloud CMS, Agile, Scrum, CI/CD, TDD, A/B Testing, WCAG Compliance, Responsive Design, Cross-Browser Compatibility, Web Performance Optimization, AI-Assisted Development, API Design & Documentation.

ADDITIONAL INFORMATION

PERSONAL PROJECTS

Shopify App (AIFA E-commerce)

Live: aifa-cloud.netlify.app | GitHub: github.com/ayoobnazz/AIFA-Ecommerce-React

Personal full-stack e-commerce application built with React.js, featuring product catalog, shopping cart, and secure checkout functionality. Demonstrates expertise in responsive design and modern UI/UX patterns.

PERSONAL PROJECTS

Live Score Streaming (Score Wire)

Live: score-wire.onrender.com | GitHub: github.com/ayoobnazz/score-wire

Personal real-time sports score tracking application with live updates and streaming capabilities. Showcases proficiency in modern web technologies for seamless user experience and instant data updates.
